

The IC Resources Assessment Tool is available for all contractors under the IC Resources Payroll Solution

# IR35

## OUR PAYROLL SOLUTION INCLUDES:

- A full IR35 assessment using the IC Resources tool.
- Underwritten determinations for anyone deemed working outside IR35.
- An IR35 compliant contract.
- A single point of contact who would remain in close contact with the contractor to ensure they continue abiding by the working practices that class them as outside IR35.
- A specialist IR35 team who can answer any IR35 related queries from the contractors.
- An inhouse accounts team that will pay the contractor fortnightly.
- Use of our timetemp timesheet portal.
- Assisting new contractors with setting up limited companies where applicable.

Unlike the CEST tool, this offering eliminates any risk and liability. If HMRC do carry out an investigation and deem one of your contractors as working inside IR35, then as long as the contractor is adhering to the rules and working practices stipulated in their contract, all penalties, fines and unpaid tax etc. are underwritten.
